

EXPERIENCE

Infrastructure Analyst (Grad Scheme), DXC Present

- Engaged in cross functional NSSR's and CISP activities with the client and internal teams. Contributing informed questions and discussion points. Improving customer experience through CISP.
- Translated theoretical cloud and ITIL knowledge into practical understanding by observing real-world service management processes in a live client environment.
- Regularly volunteer with the Tech Bar, gaining first-hand exposure to live service delivery, incident handling and customer interaction/experience.

Contact Centre adviser, Metro Bank November 2024 – September 2025

- Consistently achieved over 80% customer satisfaction scores and maintained KPIs such as Average Handling Time (AHT) above standard by efficiently resolving complex online/ mobile banking, account and card queries.
- Strengthened customer data security through multi-level identity verification, fraud prevention, and GDPR compliance.
- Optimised operations by leveraging CRM systems and the 4tress security tool, improving accuracy in service delivery and secure data handling.
- Tried and tested an internal AI-powered chatbot (usability, scenario-based, functional, and stress testing), delivering feedback that enhanced reliability, efficiency, and query resolution speed resulting in Average Handle Time (AHT) reduction by more than 30%.

Customer Assistant, Morrisons June 2023 – September 2023

- Improved team efficiency by 50%, reducing stock replenishment time and accelerating inventory turnover, which enhanced overall department productivity.
- Operated in a high-paced retail environment, applying time and resource management to consistently meet team KPIs and customer needs.

Customer Advisor, Boots June 2022 – November 2022

- Enhanced order fulfilment accuracy by achieving a 90% pick rate, reducing errors and improving overall customer satisfaction.
- Led the management of 300-350 orders daily, helping drive a 50% increase in store sales through operational efficiency and attention to detail.
- Onboarded and trained new employees, improving team capability and streamlining operations within 3 months – reflecting leadership and knowledge sharing.
- Identified pain points during peak seasons and proposed layout improvements to reduce congestion, enabling the team to maintain a 90% pick rate during peak periods.

Projects

Expense Explorer – Dissertation (achieved over 80%)

- Developed an iOS budgeting app using Swift and OCR, applying FDD, MVP, and MoSCoW prioritisation to deliver core features rapidly.
- Refined navigation and accessibility through iterative Figma prototyping and usability testing, driving 90% user retention and satisfaction during testing.

Full stack Food Recycling website – (Scrum Master)

- Led Agile sprints with a cross-functional team delivering 90% of sprint goals over six sprints and 80% of user stories ahead of schedule by applying Scrum practices, backlog refinement, and stakeholder alignment.
- Coordinated integration of JavaScript, Java, REST API, and MySQL, applying Postman testing to resolve issues early and ensure secure delivery.

EDUCATION and Certifications

Brunel University London

Bachelor of Science in Computer Science

- 1:1 + Achieved over 80% in Dissertation, Key Modules: Cybersecurity (80%), Project Management, Usability Engineering.
- APM Project Fundamentals Qualification (PFQ).
- ITIL V4 - ITIL Foundation Certificate in IT Service Management.
